

Feya's Statement on Environmental Management and Carbon Reduction Plan

At Feya, we are committed to operating in an environmentally responsible manner and contributing to the global effort to combat climate change. As part of our dedication to sustainability, we are pleased to announce the completion and publication of our Carbon Reduction Plan, in accordance with the UK Government's Procurement Policy Note 06/21 (PPN 06/21) on "Taking Account of Carbon Reduction Plans in the Procurement of Major Government Contracts."

Our Carbon Reduction Plan outlines our strategies and commitments to reducing our carbon footprint, ensuring transparency, and meeting the required reporting standards. The plan is now publicly available on our website and serves as a testament to our commitment to environmental stewardship.

Key Components of Feya's Carbon Reduction Plan

1. Baseline Emissions Reporting

We are working to establish a comprehensive baseline of our carbon emissions, covering Scope 1, Scope 2, and relevant Scope 3 emissions. This baseline forms the foundation for setting measurable and achievable carbon reduction targets.

2. Carbon Reduction Targets

Feya is committed to achieving net-zero carbon emissions by 2050. Our intermediate targets include reducing our carbon emissions by 30% by 2030 from our baseline year. We will regularly review and update these targets to reflect advancements in technology and best practices in carbon management.

3. Reduction Measures

To meet our carbon reduction targets, we have implemented a range of measures, including:

- Energy Efficiency: Investing in energy-efficient equipment and technologies across our operations, including manufacturing and office facilities.
- Renewable Energy: Transitioning to renewable energy sources, such as solar and wind, to power our operations.
- Sustainable Procurement: Prioritizing suppliers who demonstrate strong environmental credentials and low-carbon operations.
- Waste Reduction: Implementing waste reduction and recycling programs to minimize our environmental impact.
- Transportation Optimization: Optimizing our logistics and distribution networks to reduce fuel consumption and associated emissions.

4. Monitoring and Reporting

We are committed to transparently monitoring and reporting our progress toward achieving our carbon reduction goals. This includes annual reporting on our emissions, reduction measures, and performance against our targets. Our Carbon Reduction Plan will be updated annually to reflect new data and any changes in our strategy.

5. Engagement and Education

We believe that achieving our carbon reduction goals requires the engagement of our entire team and supply chain. We are dedicated to educating our employees, suppliers, and partners about our environmental objectives and encouraging them to adopt sustainable practices.

6. Stakeholder Collaboration

Feya will continue to collaborate with industry partners, governmental bodies, and environmental organizations to share knowledge, best practices, and innovations in carbon reduction.

We encourage our customers, suppliers, and all stakeholders to review our Carbon Reduction Plan on our website and join us in our journey toward a more sustainable future. By taking these steps, Feya not only complies with the requirements of PPN 06/21 but also aligns with our values of responsibility, transparency, and commitment to the environment. Together, we can make a significant impact in reducing carbon emissions and protecting our planet for future generations.
